Mulund West, Mumbai, Maharashtra, India - 400080

SUMMARY

I'm a Computer Engineering graduate with hands-on experience in software development, web development, game development, and data analysis. I excel at leading teams, tackling challenges, and moving projects forward. I'm eager to apply my skills to new opportunities in software development and data analytics, and contribute to innovative projects.

EDUCATION

- **Don Bosco Institute of Technology** — *2020 - 2024*
  B.E. - Computer Engineering — Mumbai, Maharashtra
  ◦ GPA: 8.00

- **Vani Vidyalaya Junior College** — *2018 - 2020*
  science — Mumbai, Maharashtra

EXPERIENCE

- **IDZ Digital Pvt Ltd** — *Oct 2024 - Dec 2024*
  Software Developer — Mumbai, Maharashtra
  ◦ Developing real-time iOS applications using Swift and Xcode, focusing on performance and user experience
  ◦ Collaborating with the team to design and implement innovative features for mobile applications.

- **Don Bosco Institute of Technology & Department of CRS, Larsen & Toubro Limited** — *Aug 2023 - Jan 2024*
  QGIS & Python Education Intern — Mumbai, Maharashtra
  ◦ Developed and delivered QGIS sessions, simplifying geospatial data concepts and providing hands-on training for urban planning applications.
  ◦ Led Python programming sessions using the Turtle library, bridging theoretical concepts with practical coding applications.

PROJECTS

- **Customer Care Analysis for E-commerce Website: Voice-Controlled Chatbot Development** — *July 2023 - February 2024*
  Tools: Python, Natural Language Processing (NLP) [⭘]
  ◦ Built a voice-controlled chatbot to enhance user interaction on a furniture website.
  ◦ Utilized Natural Language Processing (NLP) to improve chatbot accuracy and handle diverse user queries.
  ◦ Enabled voice-command navigation, enhancing website accessibility and increasing user engagement.

- **Weather Prediction Using Data Analysis** — *July 2022 - April 2023*
  Tools: Python, OpenWeather API [⭘]
  ◦ Developed an algorithm for accurate weather prediction using Python libraries.
  ◦ Integrated real-time data from the OpenWeather API to deliver precise and up-to-date forecasts.
  ◦ Designed a user-friendly interface to provide weather insights for non-technical users.

- **Ebookmatic: Full Stack Content Platform for Authors** — *June 2021 - March 2022*
  Tools: MySQL, Frontend Technologies, Full Stack Development [⭘]
  ◦ Created a content platform for authors with integrated rating and feedback systems.
  ◦ Designed a dynamic backend using MySQL to manage user interactions and content uploads efficiently.
  ◦ Enhanced usability and engagement through responsive design and interactive features.

PATENTS AND PUBLICATIONS

[J.1] Aniket Gupta, Aryan Gonsalves, Auxilia Arockiasamay, Imran Ali Mirza (2023). **Weather Forecasting using Machine Learning**. *International Journal of Creative Research Thoughts (IJCRT)*, Vol. 11, Issue 12, December 2023, Paper ID: IJCRT2312493. DOI: 10.32628/IJCRT2312493

SKILLS

- **Programming Languages:** Python, Swift, ASP.NET (C#), JavaScript, SQL
- **Web Technologies:** HTML, CSS, JavaScript, React (Basic), Django, Flask, FastAPI
- **Database Systems:** MySQL, DB Browser
- **Data Analysis & Visualization:** NumPy, Pandas, QGIS, Data Visualization
- **DevOps & Version Control:** Git, GitHub

CERTIFICATIONS

- **Published a game on Play Store: Mirror Golf.** — *Feb 2023*
- **Published a game on Play Store: Bullseye Blitz.** — *Jan 2024*
